Welcome

The South Carolina State Accident Fund is the leading provider of workers' compensation insurance in South Carolina. Since 1943, SAF has provided a continuous, guaranteed source of cost effective workers' compensation coverage. Today we serve nearly 100,000 employers and 200,000 employees throughout the state. Welcome to our new website!

As the leading experts on workers' compensation in South Carolina, we understand the important role we play in the economic and social well-being of the citizens of our state. A strong and viable workers' compensation system requires employers, injured workers, the medical services industry, and insurance carriers to share information and coordinate their efforts as a unified team, to minimize frequency and severity of work-place accidents and timely return injured workers to productive employment. We hope our new website will facilitate such team work and thereby add cost-effective value to our customer service.

If you have suggestions on how we can enhance the value or quality of this site, please do not hesitate to contact our webmaster at webmaster@saf.sc.gov or (803-896-5800). Thank you for helping us "Meet the Challenge!"

Harry B. Gregory, Jr.
Director

ACCIDENTS

- **"1. Accident Investigation In The Workplace"** (22 minutes)
The purpose of an investigation is to find the cause of an accident, prevent future occurrences, not to fix blame. An unbiased approach is necessary to obtain objective findings. This is an excellent video that illustrates an actual accident investigation and the proper techniques used to perform an accident investigation.
- **"2. Accident Reporting And Investigation (C-1)"** (14 minutes)
How can management work to improve on the job safety for you and your co-workers when you do not report accidents? How can hazards be fixed if the people with the authority to fix them do not know they exist? You play a key role in promoting safety in your company. To help you in that role, this video will discuss a 5 point action plan which allows you to react more effectively when an accident occurs.
- **"3. It Only Takes A Second"** (3 minutes)
This video is designed to grab the viewer's attention and focus their thoughts on safety. The video is an excellent tool to set the stage for discussion on nearly any safety issue.
- **"5. Shortcuts (B-4)"** (7 minutes)
Statistics show that the majority of on the job accidents are caused by human failure

What's our price to help reduce
your injuries and premiums ???
